

Requirements for Control APP usage

FOR CONNECTING DAC WITH A WIRELESS (WI-FI) CONNECTION

- Must Have DAC firmware versions 1.1 (2015-05-20) or later.
- To check which DAC firmware version you have, press 8,5,2,1 on the hand held remote;

- If you do not have this version already installed on your unit and you wish to connect via WI-FI instead of by Ethernet cable, you MUST send your unit to Cary Audio for a free upgrade with free return shipping back to you. If you can connect via Ethernet, follow the below requirements.

FOR CONNECTING DAC WITH A WIRED ETHERNET CONNECTION

- Must have DAC firmware version 1.0 (2015-03-18) or later. However it is always recommended you have the most recent DAC firmware installed. To check which DAC firmware version you have, press 8,5,2,1 on the hand held remote. (Please refer to firmware upgrade instructions on the DAC-200ts web page for upgrading)
