# QUICK TIP GUIDE
FOR DMS-500/550/600 APP

The bulk of the guide addresses the control and streaming of network, USB/SD sources as most other features are self-explanatory. Please note that the look or style of some features may vary slightly on the iOS version as this guide shows on an Android device.

App Main Screen

CARY AUDIO

DMS-500

Daryl's DMS

Input Rate: 44.1 kHz

Upsample Rate: 96 kHz

...ter Volume

STREAM   DISPLAY   SRC   DAC

Press to power DMS-500 On and Off.

Swipe UP to select which DMS-500 to control when using multiple units In multiple zones.

Press to go to the Settings options for App and DMS-500

Press DISPLAY to adjust DMS-500 display to LO, MID, HIGH, OFF.

"Sample Rate Converter" Press to select the desired upsample rate.

Press to select Coaxial, Optical, AES/EBU, or Bluetooth inputs.

Press Stream to select a Network or Streaming source. "LOCAL" is music stored on this device.

When in Stream/Network mode, Swipe LEFT on right edge of screen to go back to streaming control.

Tap here to reveal Volume Control

Network Input Screen

For this guide, we have focused mostly on the Network or Streaming screens as they are a bit more involved. USB, SD Card, and Internet Music inputs function similarly and are easy to navigate once you are familiar with Network Inputs.
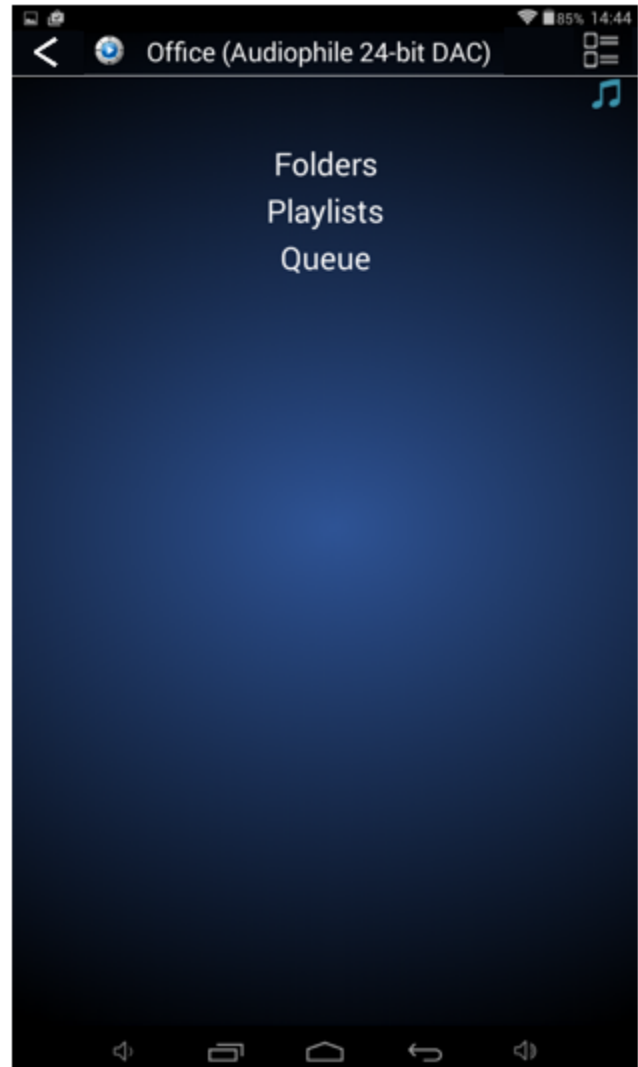

You may have also noticed an Input called "PHONESHARE" that can be accessed from the main app screen STREAM button or from the SOURCE button in the streaming screen. Phoneshare is similar to AirPlay for Android phones or tablets that you are using to control the DMS-500/550/600. Therefore, any music stored on the Android device can be streamed to the DMS-500/550/600 over network. For iOS devices the DMS-500/550/600 supports Airplay.
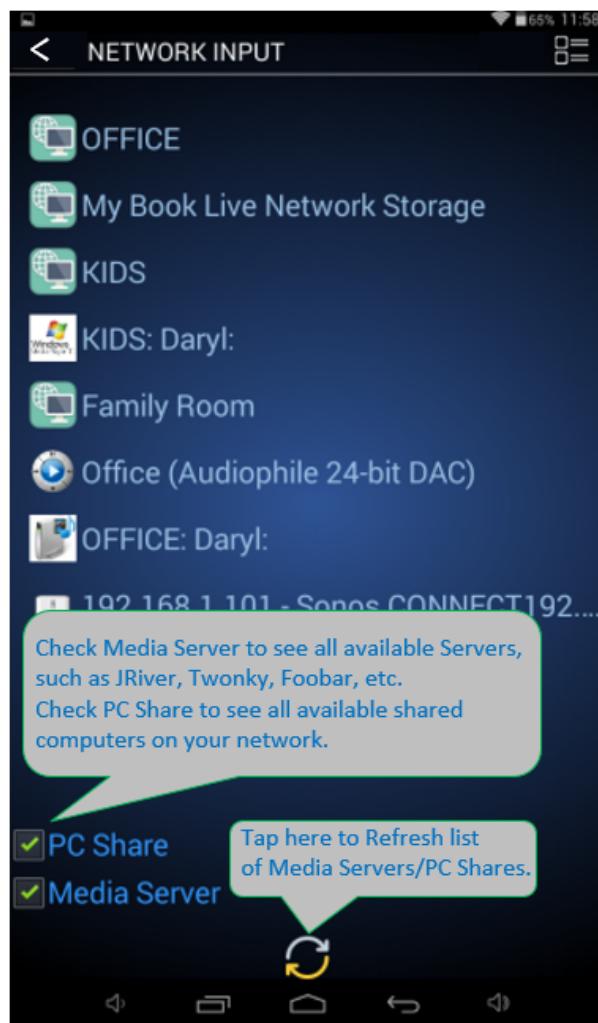

PC Share, USB/SD Home   Media Server Home

Note that the Home Screen category list is different for PC Share, USB/SD Mode vs. Server Mode. This is because severs use the folder hierarchy from the server as opposed to a preset selection as with PC Share/USB/SD. Simply select "Folders" to see the expanded selection when using servers.
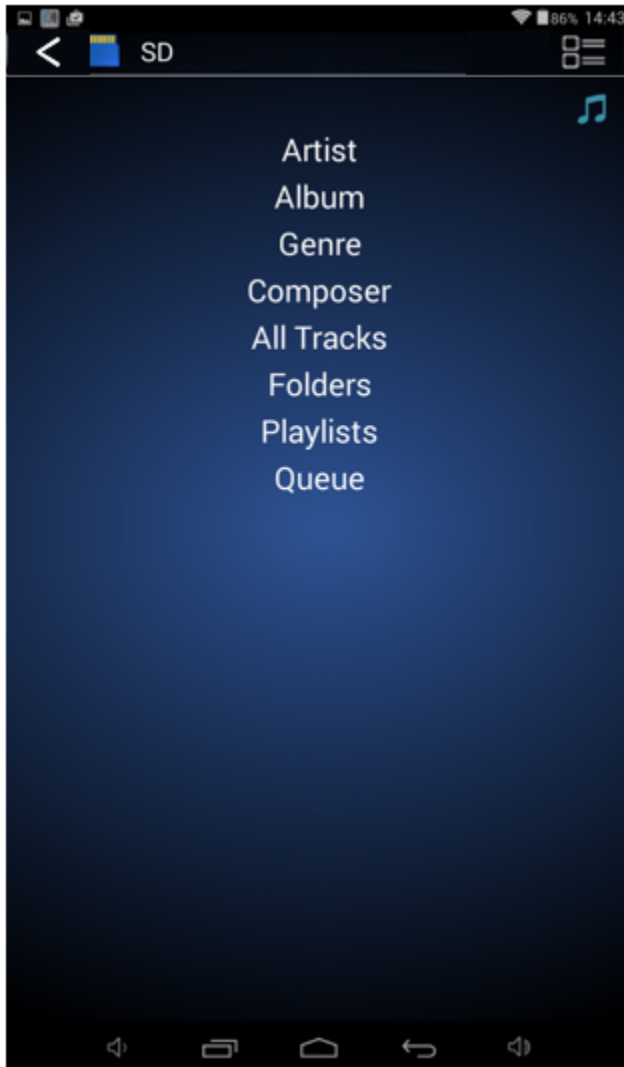

PC SHARE & USB/SD
Artist, Album, and Track Screen

Tap here to go to Queue list

Tap here to go to Now Playing

Type a keyword in the Search Bar or tap on a letter on the right edge of the screen to Jump to it.
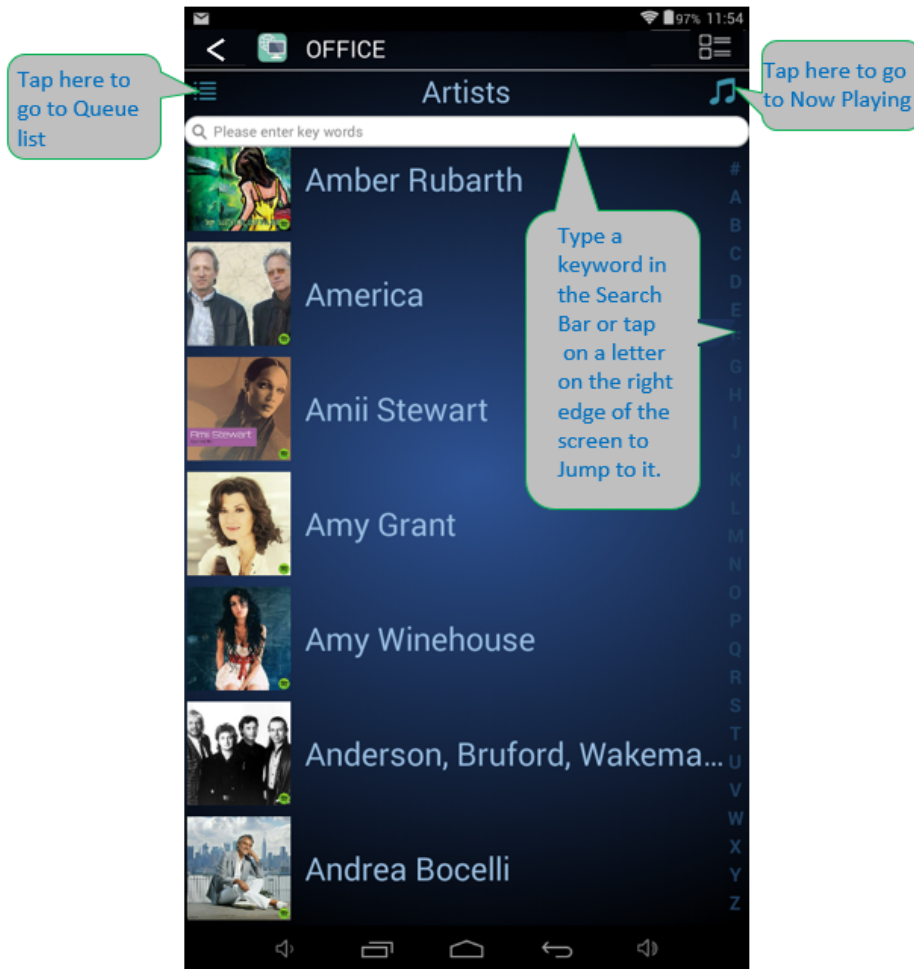

Swipe LEFT on any Artist, Album, or Track (Tracks only for Media Server sources) to quickly Add it to the Queue.

Touch and hold on any selection for more choices such as; Replace Queue, Add to a Playlist, or Add to a new Playlist.
